EVALUATION RECORD • 14 OCTOBER 2026

Semantic HTML & Accessible Name Review

WCAG 2.2 Level AA | Home page • Semantic HTML • Accessible names

Scotts Valley Market / Home page

SCOTTS VALLEY MARKET

Prepared by: Erin Van Brunt, October 2026

Status: FINAL DOCUMENTATION OF WORK COMPLETED — AUDIT INCOMPLETE

The website was updated mid-audit, and the evaluation was halted. This report finalizes the findings supported by the completed review; it is not a WCAG conformance statement for the Home page or the wider site.

Table of Contents

Executive summary **2**

1 Confirmed semantic accessibility finding **3**

A11Y-006 — linked Instacart logo 3

2 Completed Home-page semantic observations **5**

3 Inspected links and interactive controls **7**

4 Recommendations and follow-up questions **8**

5 WCAG 2.2 Level AA — Home-page results **9**

6 WCAG 2.2 A/AA criterion coverage register **12**

7 Work not completed and evaluation boundary **15**

Evaluation detail	Recorded scope
Page reviewed	https://www.scottsvalleymarket.com/ (Home page, pre-update state)
Dates	Semantic review: 12 October 2026; review halted: 14 October 2026
Standard / target	WCAG 2.2, Levels A and AA (Level AA target)
Method	Evaluator-led rendered-HTML review, Chrome DevTools accessibility properties, visual comparison; finalized keyboard record cross-referenced
Other page types	Product detail and cart/checkout entry: semantic HTML evaluation not completed
Report boundary	Home-page semantic findings only, with previously finalized keyboard findings referenced separately

Executive summary

The review found one confirmed semantic accessibility defect: the linked Instacart logo has an empty accessible name. This is assigned A11Y-006 and maps to WCAG 2.2 SC 1.1.1 and SC 4.1.2 (both Level A). Other inspected native links, major landmarks, navigation lists, and selected controls generally exposed suitable basic semantics.

The heading hierarchy, repeated generic gallery-region labels, store-hours grouping, PDF/new-tab cue, search suggestion accessibility exposure, and cart quantity announcement were documented as possible improvements or unresolved questions—not confirmed WCAG failures.

The companion finalized keyboard report independently documents Home-page findings A11Y-001, A11Y-002, and A11Y-003. Those are referenced in the WCAG results below without repeating the keyboard investigation or changing its original finding IDs.

How to interpret results

“Confirmed fail” is backed by the recorded DOM/accessibility evidence (or the finalized keyboard report). “Focused check satisfied” means only a specific property or tested interaction was verified; it is not a pass for every state under that criterion. “Partially reviewed” means some supporting evidence exists but a criterion-wide decision cannot be made. “Not evaluated” means testing did not reach that criterion. “Not applicable” is used only where absence of relevant content was established, rather than assumed.

1 Confirmed semantic accessibility finding

A11Y-006 — Linked Instacart logo has no accessible name

Field	Evidence / decision
Status	CONFIRMED FAILURE — newly recorded in the semantic HTML phase
Location	Home page: Instacart logo linked to the Scotts Valley Market Instacart storefront
Element	Native <a href="https://www.instacart.com/store/scotts-valley-market/storefront"> containing a single <img alt="">
DevTools computed properties	Selected anchor: role = link; name = empty string; focusable = true
User impact	Assistive technology may identify a focusable link without conveying that it opens grocery shopping on Instacart.
WCAG 2.2	SC 1.1.1 Non-text Content (A) — FAIL; SC 4.1.2 Name, Role, Value (A) — FAIL
Remediation	Supply meaningful alternative text on the linked image (e.g., alt="Shop Scotts Valley Market groceries on Instacart"), or give the anchor an equivalent accessible name while retaining decorative image alt as appropriate.
Verification	Recheck the anchor's computed accessible name and its announced purpose after remediation. Severity not assigned.

The instruction beneath the logo ("Click the InstaCart logo to visit Scotts Valley Market Online Grocery Shopping!") is valid paragraph text, but it is not programmatically associated with the adjacent link and does not name that link.

The Instacart destination itself is an external third-party service and was not comprehensively evaluated.

Previously finalized keyboard findings — cross-reference only

ID	Observed Home-page failure	WCAG 2.2
A11Y-001	Promotional/coupon image lightbox: close/navigation controls not reliably keyboard-operable; focus can proceed behind overlay.	2.1.1 (A); 2.4.3 (A); 2.4.11 (AA)
A11Y-002	Rotating promotion and two coupon image controls lack a persistent visible focus indicator.	2.4.7 (AA)
A11Y-003	After “Skip to Main Content,” the next focused main-content link is entirely outside the viewport.	2.4.11 (AA)

A11Y-004 and A11Y-005 belong to the separate commerce-page keyboard record. Their detailed results are not repeated as Home-page semantic findings. The keyboard report remains the source of truth for reproduction steps and its focused keyboard WCAG determinations.

2 Completed Home-page semantic observations

Document metadata, landmarks, and navigation

Component / check	Observed result	Disposition
Page language	<html lang="en">; content primarily in English.	Focused check satisfied: 3.1.1 (A).
Page title	“Fresh Produce, Meat, Seafood, Online Ordering | Scotts Valley Market”.	Focused check satisfied: 2.4.2 (A).
Structural landmarks	One site-wide <header>, one <main>, one site-wide <footer>; placement in a logical sequence.	Native structural semantics present; no defect identified in the inspected elements.
Navigation	Header and footer each use native <nav> and / /<a> structure; About and Contact include nested submenu lists.	Appropriate navigation/list structure; no confirmed defect.
Search	One <form role="search">, <input type="search">, and native submit button.	Appropriate base markup; interaction and suggestion exposure not fully verified.
Named regions	Five role="region" landmarks: “top of page”, three “Slide show gallery”, “bottom of page”.	All named; different gallery regions have non-distinct labels (recommendation only).
Other landmarks	No <aside> or complementary role found.	Not required for this page.

Heading outline and visual sections

Rendered heading	Actual page use	Assessment
H1 — “Order your favorite Deli Sandwiches, BBQ and more online here!”	Red promotional link near top of content.	Heading appears to style a promotional CTA rather than identify the page.
H5 — “We’re hiring! Click here to apply online!”	Standalone hiring link above footer.	Link is not introducing a content section; a heading is not necessary.
H4 — community-support statement	Footer statement about supporting local merchants and community.	Statement is not functioning as a section heading.

The H1 → H5 → H4 outline does not provide a useful hierarchy for the visible Home-page content. This is a documented semantic-design recommendation, not a confirmed failure of SC 1.3.1 or SC 2.4.6 based on the completed checks. Heading-level jumps alone do not prove a WCAG violation.

Lists, tables, and meaningful order

Check	Observed result	Disposition
Unordered lists	Eight elements: primary navigation, nested About/Contact links, and empty Wix “More” containers in header/footer.	List nesting observed as appropriate; empty containers are not defects by themselves.
Ordered lists	No elements.	No ordered instructions/sequence needing identified.
Visually grouped store hours	Label and four hours/holiday entries use separate <p> elements.	Acceptable paragraphs; <h2> and could improve grouping.
Tables	No <table> elements; no visually tabular data identified.	Table markup not required for the content inspected.
DOM sequence	Main promotional banner precedes Instacart; lower major sections follow visual reading order.	No meaningful-order issue observed within those compared sections (SC 1.3.2 limited review).

3 Inspected links and interactive controls

Element	Programmatic evidence	Disposition
Red online-ordering banner	Native <a href="/orderonline">; role link; accessible name matches visible CTA; focusable.	No link-name or native-role defect; H1 recommendation remains.
Site logo	Not an interactive link; image alt = “Scotts Valley Market logo”.	Appropriate for the inspected non-interactive image.
Instacart promotional link	Native <a>; only child <img alt="">; computed accessible name empty.	CONFIRMED FAIL — A11Y-006.
Instacart explanatory text	Native <p> with readable instructions; paragraph’s empty computed name is normal.	No defect in paragraph itself.
“We’re hiring!”	Native <a>; computed name describes application CTA; href points to Home page.	Name/role appropriate; incorrect destination already described in finalized keyboard record as general functionality problem.
Privacy policy	Native link, meaningful visible name, destination PDF, target="_blank".	No semantic failure confirmed; optional PDF/new-tab cue.
Footer email	Native mailto link; computed name is full contact email; focusable.	Appropriate link semantics.
“Let’s Chat!” launcher	Native <button> inside third-party iframe; computed name “Let’s Chat!”; focusable.	No basic name/role issue; opened chat semantic review unfinished.
Shopping bag launcher	Focusable ; computed role button/name “Shopping cart”.	Basic custom-button semantics present; displayed item quantity absent from accessible name, requiring follow-up.
About submenu	About anchor changes aria-expanded from false to true when opened; adjacent named dropdown button; nested .	State change observed on link; relationship of exposed list and button not fully assessed.
Search suggestions	role="listbox" and role="option" with aria-selected; containing element observed aria-hidden="true" while visual suggestions displayed.	Possible exposure mismatch; accessibility-tree/AT behavior not established.

The three Home-page promotional/coupon galleries were located, but their individual image/lightbox semantics were not finished in this phase. The earlier keyboard evaluation of the gallery/lightbox interactions remains valid historical evidence for the evaluated version.

4 Recommendations and follow-up questions

Recommended markup refinements (not additional confirmed WCAG failures)

Priority topic	Suggested improvement
Heading structure	Provide a clear Home-page H1 (“Scotts Valley Market”); consider an H2 “Current Specials” for the rotating gallery; use an H2 “Store Hours” and an H2 “Contact & Location” for the footer information. These are recommended structures, not mandated heading counts.
Promotional calls to action	Render the online-ordering and hiring CTAs as standard links rather than using H1/H5 solely for emphasis; render the community-support statement as a paragraph. Preserve visual appearance through CSS.
Store hours	Optionally use / for the four hours and holiday entries after a “Store Hours” heading. Existing paragraph markup is not automatically a failure.
Contact details	Consider <address> for appropriate business contact information; the current <p> with line breaks is not automatically a failure.
Gallery landmark names	Distinguish “Weekly Specials gallery”, “Valley Bucks promotion”, and “Free Valley Bucks promotion” rather than repeating “Slide show gallery” three times.
Scroll-marker regions	Review whether “top of page” and “bottom of page” merit role="region" landmarks; they may add navigation clutter.
Page title	Optional editorial simplification: “Scotts Valley Market | Local Grocery Store & Fresh Foods”. Existing title remains adequately descriptive.
Privacy policy link	Consider indicating the PDF format and the new-tab destination in link text or nearby context.
Hiring link	Correct the advertised application destination. This is cross-referenced from the keyboard record, not assigned a new semantic finding.

Questions not resolved before evaluation stopped

- Search autocomplete: determine whether the visible suggestions are correctly included in the accessibility tree when the container shows aria-hidden="true".
- About/Contact dropdowns: verify exposed submenu semantics and state ownership in all opened states; one About link was observed changing to aria-expanded="true".
- Shopping bag: determine whether item count and changes are announced by an accessible mechanism beyond the launcher's "Shopping cart" name.
- Promotional galleries/lightboxes: inspect individual image/coupon controls, roles, names, states, and structure; keyboard failures are separately recorded.
- Opened "Let's Chat" window: inspect structural roles, controls, labels, chat messages and dynamic status/error elements. The closed launcher alone was checked semantically.

5 WCAG 2.2 Level AA — Home-page results

This section includes every WCAG 2.2 Level A and AA success criterion. Only criteria supported by the completed Home-page semantic checks and the existing finalized Home-page keyboard record have a result. All others remain untested or only partially reviewed because the site was updated during the audit.

Legend: CONFIRMED FAIL = demonstrated criterion failure; FOCUSED CHECK SATISFIED = narrow relevant check passed; PARTIAL REVIEW = evidence collected, no complete criterion disposition; NOT EVALUATED = no criterion-level determination. No full-page conformance status is asserted.

Home-page results supported by evidence

SC / level	Result	Basis
1.1.1 / A	CONFIRMED FAIL	A11Y-006: linked Instacart logo <img alt=""> has no equivalent text for its function.
1.3.1 / A	PARTIAL REVIEW	Landmarks, nested navigation lists, store-hours paragraphs, headings and region names inspected; no full-page conclusion.
1.3.2 / A	PARTIAL REVIEW	Compared key major visual/DOM reading sequence; no issue observed there.
2.1.1 / A	CONFIRMED FAIL (keyboard record)	A11Y-001: Home-page image lightbox controls not reliably keyboard operable.
2.1.2 / A	FOCUSED CHECK SATISFIED (keyboard record)	Tested keyboard routes could be exited; not a full component/AT coverage result.
2.4.1 / A	FOCUSED CHECK SATISFIED (keyboard record)	Skip-to-content mechanism bypassed repeated navigation; separate focus visibility failure A11Y-003.
2.4.2 / A	FOCUSED CHECK SATISFIED	The inspected Home-page title describes the business and its offerings.
2.4.3 / A	CONFIRMED FAIL (keyboard record)	A11Y-001: focus progresses into background content while image lightbox remains open.
2.4.4 / A	PARTIAL REVIEW	Inspected links had programmatic names; hiring-link destination mismatch documented separately; no comprehensive link-purpose test.
2.4.6 / AA	PARTIAL REVIEW	Heading outline evaluated; semantic/structural improvements advised, but no criterion-wide violation confirmed.
2.4.7 / AA	CONFIRMED FAIL (keyboard record)	A11Y-002: promotional/coupon image controls lack persistent visible focus.
2.4.11 / AA	CONFIRMED FAIL (keyboard record)	A11Y-001 and A11Y-003: obscured focus in lightbox/skip-link states.

SC / level	Result	Basis
2.5.3 / A	PARTIAL REVIEW	Selected controls' accessible names align with visible text where observed; not exhaustively tested.
3.1.1 / A	FOCUSED CHECK SATISFIED	Document language en appropriate for primarily English page.
4.1.2 / A	CONFIRMED FAIL	A11Y-006: computed name of actionable Instacart link is empty; other sampled control roles/names were suitable.

6 WCAG 2.2 A/AA criterion coverage register

A complete inventory of the 55 Level A and AA success criteria. This is a coverage register, not a conformance checklist claiming all criteria were tested. "Not evaluated" does not mean pass, fail or not applicable. [1] = finding/ result from the separate finalized keyboard report.

1. Perceivable

SC / level	Criterion	Home-page audit status
1.1.1 · A	Non-text Content	FAIL · A11Y-006
1.2.1 · A	Audio-only and Video-only (Prerecorded)	Not evaluated
1.2.2 · A	Captions (Prerecorded)	Not evaluated
1.2.3 · A	Audio Description or Media Alternative (Prerecorded)	Not evaluated
1.2.4 · AA	Captions (Live)	Not evaluated
1.2.5 · AA	Audio Description (Prerecorded)	Not evaluated
1.3.1 · A	Info and Relationships	Partial review
1.3.2 · A	Meaningful Sequence	Partial review
1.3.3 · A	Sensory Characteristics	Not evaluated
1.3.4 · AA	Orientation	Not evaluated
1.3.5 · AA	Identify Input Purpose	Not evaluated
1.4.1 · A	Use of Color	Not evaluated
1.4.2 · A	Audio Control	Not evaluated
1.4.3 · AA	Contrast (Minimum)	Not evaluated
1.4.4 · AA	Resize Text	Not evaluated
1.4.5 · AA	Images of Text	Not evaluated
1.4.10 · AA	Reflow	Not evaluated
1.4.11 · AA	Non-text Contrast	Not evaluated
1.4.12 · AA	Text Spacing	Not evaluated
1.4.13 · AA	Content on Hover or Focus	Not evaluated

2. Operable

SC / level	Criterion	Home-page audit status
2.1.1 · A	Keyboard	FAIL · A11Y-001[1]
2.1.2 · A	No Keyboard Trap	Focused check OK[1]
2.1.4 · A	Character Key Shortcuts	Not evaluated
2.2.1 · A	Timing Adjustable	Not evaluated
2.2.2 · A	Pause, Stop, Hide	Not evaluated
2.3.1 · A	Three Flashes or Below Threshold	Not evaluated
2.4.1 · A	Bypass Blocks	Focused check OK[1]
2.4.2 · A	Page Titled	Focused check OK
2.4.3 · A	Focus Order	FAIL · A11Y-001[1]
2.4.4 · A	Link Purpose (In Context)	Partial review
2.4.5 · AA	Multiple Ways	Not evaluated
2.4.6 · AA	Headings and Labels	Partial review
2.4.7 · AA	Focus Visible	FAIL · A11Y-002[1]
2.4.11 · AA	Focus Not Obscured (Minimum)	FAIL · A11Y-001, 003[1]
2.5.1 · A	Pointer Gestures	Not evaluated
2.5.2 · A	Pointer Cancellation	Not evaluated
2.5.3 · A	Label in Name	Partial review
2.5.4 · A	Motion Actuation	Not evaluated
2.5.7 · AA	Dragging Movements	Not evaluated
2.5.8 · AA	Target Size (Minimum)	Not evaluated

3. Understandable

SC / level	Criterion	Home-page audit status
3.1.1 · A	Language of Page	Focused check OK
3.1.2 · AA	Language of Parts	Not evaluated
3.2.1 · A	On Focus	Not evaluated
3.2.2 · A	On Input	Not evaluated
3.2.3 · AA	Consistent Navigation	Not evaluated
3.2.4 · AA	Consistent Identification	Not evaluated
3.2.6 · A	Consistent Help	Not evaluated
3.3.1 · A	Error Identification	Not evaluated
3.3.2 · A	Labels or Instructions	Not evaluated
3.3.3 · AA	Error Suggestion	Not evaluated
3.3.4 · AA	Error Prevention (Legal, Financial, Data)	Not evaluated
3.3.7 · A	Redundant Entry	Not evaluated
3.3.8 · AA	Accessible Authentication (Minimum)	Not evaluated

4. Robust

SC / level	Criterion	Home-page audit status
4.1.2 · A	Name, Role, Value	FAIL · A11Y-006
4.1.3 · AA	Status Messages	Not evaluated

7 Work not completed and evaluation boundary

The website was updated mid-audit. Evaluation stopped before the following planned work could be completed:

- Home page: semantic inspection of the remaining rotating gallery and two promotional/coupon lightbox components, plus the opened “Let’s Chat” interface.
- Home page: remaining state- and assistive-technology-dependent checks for search suggestions, dropdowns and shopping cart announcements.
- The other two selected page types: product detail and shopping cart/checkout entry were not evaluated in the semantic HTML phase. They had previously been addressed separately in the finalized keyboard phase.
- Planned supporting semantic checks with the Web Developer extension and W3C Nu Html Checker were not run.

- Other scheduled audit phases—control behavior, images, forms, color/contrast, zoom/reflow, text spacing, pointer/hover/focus, dynamic content, VoiceOver, axe DevTools, WAVE and full WCAG-EM coverage review—were not completed as part of this halted evaluation.

As a result, no complete Home-page, multi-page, checkout-process, or site-wide WCAG 2.2 Level AA conformance claim can be made from this record. The “not evaluated” entries in the coverage register must not be interpreted as N/A.

Method and source notes

Recorded evidence: evaluator-led Chrome DevTools inspection of rendered HTML and computed accessibility properties; visual comparison of the Home page; exported DOM excerpts; and the existing finalized keyboard evaluation. Findings are stated for the version observed during testing. No new testing of the updated website was performed for this report.

Companion files: “Scotts Valley Market Keyboard Audit — Revised Four Parts” (final keyboard results); “Semantic Structure & HTML Evaluation — Home Page” (working draft, 12 October 2026); “Scotts Valley Market — Semantic HTML Testing Guide & Checklist”.
