Portfolio Accessibility Audit — Keyboard Evaluation

Website: Erin Van Brunt Portfolio
URL: https://van-brunt-portfolio.vercel.app/
Evaluation Date: October 21, 2026
Standard: WCAG 2.2 Level AA
Environment: Chrome on macOS; keyboard only; VoiceOver off
Evaluator: Erin Van Brunt

1. Evaluation Scope

Manual keyboard evaluation of the Home page, including the shared header, navigation, main content, and footer. Testing included forward and reverse focus traversal, keyboard activation, focus visibility, skip-link functionality, and refresh behavior.

The third-party Vercel widget was excluded.

2. Keyboard Testing Results

All nine in-scope interactive elements were keyboard reachable, operable, and visibly focused during normal navigation.

Test	Result
Forward Tab navigation	PASS
Reverse Shift+Tab navigation	PASS
Keyboard link activation	PASS
Focus visibility	PASS
Logical focus order	PASS
Skip to Main Content	PASS
Keyboard traps	None
Focus obscured	None on focused controls

3. WCAG 2.2 A/AA Keyboard Assessment

Success Criterion	Level	Verdict
2.1.1 Keyboard	A	**PASS**
2.1.2 No Keyboard Trap	A	**PASS**
2.4.1 Bypass Blocks	A	**PASS**
2.4.3 Focus Order	A	**PASS**
2.4.7 Focus Visible	AA	**PASS**
2.4.11 Focus Not Obscured (Minimum)	AA	**PASS**

4. Documented Observations

OBS-001 — Skip link overlaps header branding

When focused, the Skip to Main Content link partially obscures the EVB branding in the header.

WCAG verdict: PASS — No violation confirmed.

The focused skip link remains fully visible, and the branding link is not focused while obscured. This does not violate SC 2.4.11. Recorded as a visual usability observation.

OBS-002 — Fragment navigation changes initial focus sequence after refresh

Activating Skip to Main Content appends `#main-content` to the URL. Refreshing with this fragment causes the first Tab to reach View My Resume instead of restarting at the skip link.

WCAG verdict: PASS — No violation confirmed.

The skip link successfully bypasses repeated navigation. The fragment-based navigation behavior does not demonstrate a failure of the assessed keyboard Success Criteria. Recorded as a usability observation.

5. Final Keyboard Accessibility Verdict

> **RESULT: PASS — WCAG 2.2 Level A/AA keyboard criteria evaluated.**

The Home page satisfies all six assessed WCAG 2.2 Level A and AA keyboard-related Success Criteria based on the completed manual evaluation.

- Criteria passed: 6
- Criteria failed: 0
- Confirmed accessibility defects: 0
- Non-failing usability observations: 2

Conclusion: The Home page passes its completed manual keyboard accessibility evaluation. No keyboard-related WCAG failures were identified within the tested scope.

Evaluation status: COMPLETE.
